If he has schooled his native dignity to this species of subserviency, he may probably have felt no mortification in reflecting upon his position. He may have settled down to the comfortable opinions of the male adherents to the ultra Woman's Rights doctrines, and seventeen years' pupilage in the leading strings of his wife may have destroyed all traces of masculine pride in his character. If so, he is scarcely to be congratulated, but as it is his own matter, he need not be condemned.

Nor do we forget that a year or two ago there were well grounded suspicions that Prince Albert's German preposessions stood between England and Russia, and assisted in keeping up the long losing game of omacy into which his country was inveigled. These circumstances are remembered by the English people and there is a pretty decided and general dislike to Prince Albert throughout the country, the frequent expression of which is only restrained by the genuine affection which is felt for Victoria. In truth Prince Albert, when he gets out of his office of father of royal children, is very apt to commit blunders. His only success in a different sphere, was in the Exhibition of 1851, and he is occasionally somewhat useful and animated at the laying of corner stones, launching of ships, and opening of public works.
